Re: CC Docket No. 94-102,  
CRS Station KMN691,  
Market No. 666(B2), Texas 15(B2) - Concho RSA,  
Transmission of E-911 Calls from TTY Devices.

Seventh Quarterly Report

Dear Ms. Dortch:

This report is filed pursuant to the directive contained in the Commission's Fourth Report and Order (CC Docket No. 94-102), FCC 00-436, released December 14, 2000.

Despite our best efforts, we were unable to meet the Commission's June 30, 2002 deadline for providing service to digital TTY handsets. Accordingly, we filed a request for a waiver and a two-month extension of time, up to and including August 30, 2002, within which to complete the system upgrades necessary to comply with Section 20.18(c) of the Rules.

The required system upgrades were completed prior to August 30, 2002, and the system now has all of the hardware and software needed to serve digital TTY handsets.

Additional information is supplied in the addendum attached hereto.

Very truly yours,  
Texas RSA 15B2 Limited  
Partnership d/b/a Five Star  
Wireless

Dated: 10/14/02

**Texas RSA 15B2 Limited Partnership  
d/b/a Five Star Wireless  
Addendum to Seventh Quarterly Report, Filed October 2002**

**Development Activities**

1. **Network Infrastructure Software Development** -- The Filer previously filed a request for a waiver and a two-month extension of time, up to and including August 30, 2002, within which to complete the system upgrades necessary to comply with the requirements of Section 20.18(c) of the Rules.

The required system upgrades were completed prior to August 30, 2002, and the system now has all of the hardware and software needed to process 911 calls originating from digital wireless TTY devices.

2. **Handset Development And Testing Plans** -- Handset vendors continue to work on the development of a TTY capable handset. The Filer will evaluate these units when they become available.

3. **Beta Testing And Lab Testing** -- The Filer is a small rural carrier, and looks to its equipment manufacturers to conduct full beta and lab testing of network software, handsets and infrastructure equipment. However, the Filer will test the equipment it procures as soon as practicable, with the goal of making sure it meets the manufacturer's specification.

4. **Release And General Availability To Carriers Of Network Infrastructure Software** -- See Response to Item 1 above.

5. **Availability To Carriers Of Full Digital Acceptance Test Units** -- Unknown at this time.

6. **Efforts Toward Achieving Digital Wireless Solution Compatibility With Enhanced TTY** -- See Response to Item 1 above.

**Testing And Deployment Activities**

7. **Carrier Coordination Of Testing With PSAP** -- The Filer will test with PSAPs in the areas where this service will be deployed. Coordination with the PSAPs will be done on a case-by-case basis, in cooperation with the relevant PSAP personnel.

8. **Carrier Testing Activities, Including Field Testing, Consumer End-to-End Testing, And Other Necessary Tests** -- All testing will be conducted in accordance with equipment vendor recommendations.

9. **Retail Availability Of Necessary Consumer Equipment** -- The Filer is unable to determine the general retail availability of consumer equipment. To the best of the Filer's knowledge, none of

the leading handset manufacturers has been able to release a date for general availability.

10. Geographic Scope Of Network Infrastructure Development -  
- See Response to Item 1 above.
